

# Liftomatic Material Handling Model 10HT-4W four-wheel hand truck

Handle rimmed drums with ergonomic hand truck.

Manual drum truck for picking up and transporting all steel, plastic and fiber drums from 5 gallons to 85 gallons.

Designed for working at same level heights - pallet to pallet or floor to floor. Unit has two 10" diameter main wheels and two 4" casters to rest drum on during transport and at idle.

Automatic and mechanical Parrot-Beak® mechanism easily handles all open and closed head drums regardless of construction. Clamp locks on drum until drum is placed back in resting position on floor.
